

▼ Important Notice for Users Planning to Upgrade to Mac OS X 10.6 (Snow Leopard) and Windows 7

For customers using Elluminate *Live!*, Elluminate *Plan!*, and Elluminate *Publish!*, please note that Elluminate does **not** support Mac OS X 10.6 (Snow Leopard) and Windows 7. Elluminate will actively test these operating systems as they are released and will offer full product support in the near future. Please continue to use our products only on the supported operating systems listed [here](#).

▼ Drag-and-Drop Functionality added to Elluminate *Live!* V9.5 Breakout Rooms

Breakout Rooms are a great way to facilitate small group activities or private meetings. Now it's even easier to move participants from room to room using the new drag-and-drop functionality available in Elluminate *Live!* V9.5.

To drag and drop participants or moderators from the main room to a breakout room, just select the person you want to move and drag your selection to a breakout room, while holding down the mouse button. When your cursor is over the desired breakout room, release the mouse button. You can also drag multiple participants by selecting the first participant and holding down the Control key to select the next participant.

For more information on using breakout rooms and other Elluminate *Live!* V9.5 features, please visit the training [website](#).

With the Techline, we strive to provide you with tips and best practices on using our products. If you have any questions, need some advice, or have anything to share with our other readers, visit [LearnCentral](#) and join the "Elluminate Techline" group.
