"Blending the Online and Face-to-Face Learning Environments"

[Register Now!](#)

Open until 2 PM (ET) the day before the webinar.

Meeting student needs often means discarding conventional instructional delivery. Rather than placing students in a model, build the model to fit the student. Using digital curriculum, see how school districts deliver several blended models for credit recovery, original credit in Juvenile Justice programs, expulsion programs, dropout retrieval programs, community learning centers and self-contained ESE units. Hear panelists from a school district, a fully blended high school, and a high school teacher blending learning in his classroom.

Speakers

Todd Yarch, VOISE Academy Chicago Public Schools
