

RURAL STRATEGY ONLINE SERIES

The rural Education Network is an electronic learning community where educators in both rural and urban schools are encouraged to interact and improve practice together. The Network's ultimate purpose is to ensure that educators in rural areas have an opportunity to develop and share the expertise necessary to provide their students with an equitable education.

The online series is provided at no cost to the educators. The series will follow-up on the themes of the rural conference in order to help educators develop skills for use in their classroom this year. While is not required you are asked to sign up for sessions below in order to receive an email reminder of the session the week before it occurs.

Name _____ School Name _____

Email Address: _____ School District _____
