

RURAL EDUCATION NETWORK: ARCHIVED SESSIONS - JANUARY TO JUNE 2007

Community Learning Series - Web-cast Schedule: January 8 to June 25, 2007

SERIES TITLE: Teaching Strategies for the Hybrid Classroom

Session Description: Yennadon Cyberschool is in the fourth full year of a flexible hybrid face-to-face / online learning environment. It uses a variety of free, open source learning tools to complement teaching with both types of students. This presentation will look at Yennadon's learning model, the advantages of open source software and the use of two collaborative learning tools that facilitate communication and a variety of learning activities. Manhattan is used for easy and effective online discussions, even at the elementary-school level and is a safe, protected environment for communication between teachers and students. Moodle is used for learning – both independently and interdependently – reflecting, testing, sharing, assessing, editing and a host of other learning activities. Andy Sundahl, Vice Principal of EBUS Academy, based in Vanderhoof, will be facilitating this session which will feature teachers Dave Dixon and Keith Rajala.

Monday May 14th, 3:30-5:00 pm
